

- Yellow: Scrub/shrub habitat (lightly flooded during larger storm events)
- Light green: Shallow emergent wetland (Dry 75% of growing season)
- Dark Green: Deep emergent (dry 50% of growing season)
- Light blue: Shallow micropool (dry 25-50% of growing season)
- Dark Blue: Deep Micropool (dry 5-25% of growing season)

Riparian forest would be planted in all other newly dried areas of the existing plan.
