

TOWN OF NEW CASTLE

DEPARTMENT OF PUBLIC WORKS – WATER DEPARTMENT

The New Castle/Stanwood Consolidated Water System employees are in the process of completing a federally mandated Water Service Line Materials Inventory. Approximately 1,100 homes remain to be inventoried. Letters will be mailed to affected homeowners. Please contact the DPW office at (914)238-3968 or dpw@mynewcastle.org to set up an appointment for a field inspection of your Water Service Line if you receive a letter.

Please keep your Water Service Line, Curb Stop and Plumbing Fixtures in good repair to prevent unnecessary waste of water. Properties served by a long Water Service Line will also have a Meter Pit to maintain. Contact the DPW office with any questions.
